

Premium Activated Carbon Block Water Filter Cartridge

Features of the premium activated carbon block water filter cartridges:

- These water filters comply with ANSI/NSF53 and 42 requirements.
- **Ceramic activated carbon block water filters** for **sediment, chlorine, cyst (cryptosporidium) & giardia removal.**
- These water filters effectively reduce chlorine, VOCs, pesticides, hazardous chemicals and odours.
- Improves taste.
- Low pressure drop, high dirt holding capacity, durable physical strength, and steady flow to achieve reliable performance & longevity.
- Our water filters are manufactured in compliance with NSF and FDA requirements in material and processing.
- The water filters serve residential, commercial & industrial ranges with standard NPT DOE caps. OEM caps designs available upon request. Alternative to KX Matrix® CR1 / Pentair CBC-series.

Specifications of the premium activated carbon block water filter cartridges:

Model No.	Length	OD	Nominal Micron Rating	85% 2 (ppm) Chlorine R. Life span @ H ₂ O flow rate	85% Cyst Life span @ H ₂ O flow rate
CBC-10C	9 3/4"(248mm)	2 1/2"(63mm)	0.7uM/Micron	14,000 Litres @ 5 lpm	6,000 Litres @ 5 lpm
CBC-20C	20"(508mm)	2 1/2"(63mm)	0.7uM/Micron	22,000 Litres @ 5 lpm	12,000 Litres @ 5 lpm
BCBC-10C	10"(254mm)	4 1/2"(115mm)	0.7uM/Micron	40,000 Litres @ 10 lpm	20,000 Litres @ 10 lpm
BCBC-20C	20"(508mm)	4 1/2"(115mm)	0.7uM/Micron	82,000 Litres @ 20 lpm	40,000 Litres @ 20 lpm

Aqua filter functions:

- 99% of the chlorine, chloroform, & chloramines removed.
- These water filters prevent microorganism proliferation and reduce mineral scale buildup.
- The water filters remove sulfurated hydrogen, bivalent iron, ammonia nitrogen and nitrite nitrogen.
- These water filters reduce suspended solids, and turbidity.
- The water filters are effective in cyst (cryptosporidium) & giardia removal.
- Bacteria resistance up to 99.5% against staphylococcus, escherichia bacillus, pseudomonas aeruginosa, liebsiella pneumonia and candida albicans.
