

Granular Water Filtering Media Cartridges

Features of the water filters:

- Multiple media available which are formulated to order.
- Low pressure drop, high dirt holding capacity, durable physical strength and steady flow to achieve reliable performance & longevity.
- Water filter cartridges are manufactured in compliance with NSF and FDA requirements.
- NSF compliance medias.
- These water filters serve residential, commercial & industrial ranges.

Specifications:

Serial No.	Dimensions	Description of the water filters	Operation flow
GAC	2 1/2" x 10" / 20"	10"/20", opaque housing, openable cap for media replacement.	3 LPM - 5 LPM
UDF	2 1/2" x 10" / 20"	10"/20", white housing with green / blue NPT caps.	3 LPM - 5 LPM
OCB	2 1/2" x 10" / 20"	10"/20", half clear housing, fixed NPT caps.	3 LPM - 5 LPM
KGC	2 1/2" x 10" / 20"	10"/20", white housing / blue cap.	3 LPM - 5 LPM
CGC	2 1/2" x 10" / 20"	10"/20", clear housing, openable cap for media replacement.	3 LPM - 5 LPM
BGAC	4 1/2" x 10" / 20"	10"/20", jumbo, white housing / openable blue cap.	10 LPM

Optional media *1 (combination formula media available upon requested)

- C	Coconut shell GAC	Granular activated carbon from washed coconut shell.
- B	Bamboo GAC	PH adjustment and taste improvement for R/O product water.
- L	Lead Sorb	Heavy metal removal media.
- K	KDF55	Bacteria reduction.
- R	Resins	Water softening and TDS reduction.
- R+/-	Resins	mixing bed resins.
- P	Polyphosphate	Scale inhibitor; moves tube scaling in RO, water dispenser and purification systems.
- M	Mineral	Replaces calcium, magnesium, sodium and other minerals in product water following RO.
- PH	Ceramic	Alkaline PH control.
- CS	Calcium Sulfate	Calcium sulfate to enhance chlorine reduction for higher chlorine concentrations and hot water.
- DIR	Green sand	Iron / rust colour removal via alcium sulfate to enhance chlorine reduction for higher chlorine concentrations.

Note: 1. media data sheet available upon request.
