

Direct Flow (Tankless) Commercial / Residential Reverse Osmosis

Reliable Workmanship / Durable Quality / Cost Effective

Reverse osmosis models:

- #CAS-DRO-180: 180 GPD Commercial reverse osmosis purifier (RO membrane water purifier).
- #CAS-DRO-360: 360 GPD Commercial reverse osmosis purifier.

Features of the reverse osmosis system:

- Easy Installation.
- Compact twin-head heavy duty booster pump with high power and long life features.
- 1812 high flow 180 gpd / 690lpd output membrane with a salt-reduction rate of 95%.
- All reverse osmosis components conforms to FDA / ANSI/NSF standards.
- NSF42 certificated water filter cartridges / CE certified transfer adapter.
- Constant quality performance.
- Quality components.

Specifications of the reverse osmosis system:

- Carton box: 40 cm x 55 cm x 25 cm, 11 kgs.
- Standard parts with water flow restrictor, check valve, high pressure switch, low pressure switch, transformer adapters. More specification details on chart below.
- Accessories of the reverse osmosis system included:
wrench, faucet hanger, ball valve, feeding valve, PE tubes, drain saddle valve.

Specifications		Standard
Booster pump		Twin head 48V DC/ 2 LPM @ 120 PSI.
Solenoid valve		Electric magnetic valve.
Pre-filter housing		10" EG double o-ring, clear white - white.
Bracket		Stand shelf #H-SS-10-1
Faucet		Ceramic faucet #H-F-3S
Connectors		3/8", Jaco mode connectors
Membrane		1812 Taiwan origin reverse osmosis membrane 180 GPD x 1 e.a. or x 2 e.a.
Water filter cartridge scheme	Pre-water filters	1 1uM Sediment water filter 2 10uM Carbon block water filter 3 5uM Absolute Carbon block water filter
	Post in-line water filter cartridges	Nano silver bacteria resistant carbon water filter

P.S. Production specifications are subject to reconfirmation.
